

Maxi Horizontal Gel Electrophoresis System

Maxi is primarily designed for resolution of high numbers of samples like cloning or PCR experiments. Maxi allows ultra high-resolution separations over extended runs. Tray sizes correspond to standard blotter sizes. It also allows easy sample transfer onto a membrane for further analysis. Three tray sizes are available, 20 x 20cm, 20 x 25cm and a half length, 20 x 10cm. Multi-channel pipette compatible combs up to 40 sample facilitate speed loading of up to 440 samples per gel. 50 sample combs allow maximum sample capability of 550 samples per gel.
